GUIDE TO THE INDUSTRIAL STATISTICS OF THE INDUSTRY AND MERCHANDISING DIVISION JANUARY, 1959

A WORKING MANUAL

Published by Authority of

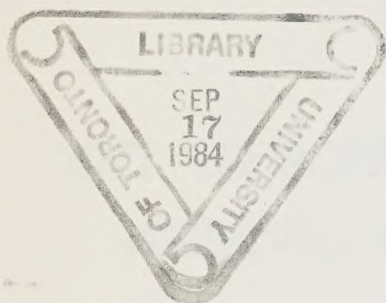

The Honourable Gordon Churchill, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS

Industry and Merchandising Division

May, 1959
6503-501

Price 50 cents

FOREWORD

This Working Manual is a revision of *Guide to Publications of the Industry and Merchandising Division Which Delimit Sub-Groups of the Standard Industrial Classification*, issued in July, 1957.

In the Dominion Bureau of Statistics, we are conscious of the need for providing all potential users of our data with full information about the material available. This manual was designed to assist in that aim.

This guide was prepared by Mr. R. J. Loosmore, Assistant to the Director of the Industry and Merchandising Division.

Current Publications, which is obtainable free of charge from the Information Services Division, gives the prices of publications mentioned in this guide and explains how to order them.

February, 1959.

WALTER E. DUFFETT

Dominion Statistician.

TABLE OF CONTENTS

Major group of industries:	Page
Logging.....	9
Fishing	9
Metal mining	9
Fuels	10
Non-metal mining	10
Quarrying, clay and sand pit.....	11
Prospecting	11
Foods and beverages	11
Tobacco and tobacco products	12
Rubber products	12
Leather products	13
Textile products (except clothing)	13
Clothing (textile and fur)	14
Wood products.....	15
Paper products	16
Printing, publishing and allied industries	16
Iron and steel products	16
Transportation equipment	17
Non-ferrous metal products	18
Electrical apparatus and supplies	18
Non-metallic mineral products	19
Products of petroleum and coal	19
Chemical products	20
Miscellaneous manufacturing industries	21
Wholesale trade	22
Retail trade	24
Recreation service	27
Business service	27
Personal service	28

GUIDE TO THE INDUSTRIAL STATISTICS OF THE INDUSTRY AND MERCHANDISING DIVISION

JANUARY, 1959

This guide was designed to assist users of the Division's publications who may wish to compile annual data according to the sub-groups of the standard industrial classification. This classification is laid down in the *Standard Industrial Classification Manual* published in 1948, and it is currently being revised.

The Industry and Merchandising Division compiles statistics in a number of major groups of the standard industrial classification. These consist of all major groups in the divisions of mining, manufacturing and trade, together with the major groups, logging, fishing, business service and personal service. All industries within these groups are listed in this guide. Information is given on any annual reports which give statistics for these industries individually. In the case of the merchandising and service trades, monthly publications are also listed, and in addition to the material outlined in this memorandum, this sector is covered fully in the Decennial Census of Distribution.

In the case of mining or manufacturing, an industry is recorded as covered individually if the principal statistics of the industry are published as such, or can be built up from published material. The principal statistics of a manufacturing industry consist of data on the number of establishments, the number of employees and their earnings, the cost of materials used, the cost of fuel and electricity used, the value added by manufacture, and the selling value of factory shipments. In the case of mines, the principal statistics consist of data on the number of establishments, the number of employees and their earnings, the cost of fuel and electricity used, the cost of process supplies and containers, the net value added by processing, and the gross value of production. The fact that principal statistics are prepared for an industry does not, of course, necessarily mean that any other statistics are.

In the case of the merchandising and service trades, an industry is recorded as covered individually if the value of sales is available. Other relevant information available for the industry as such is also recorded in some cases.

Some industries are not covered individually in publications. In some cases, such as photography, there are no statistics collected. In other cases, such as rubber footwear, the statistics for the industry may be merged with those of another; in this case, tires, tubes and other rubber products.

This guide replaces *Guide to Publications of the Industry and Merchandising Division which Delimit Sub-Groups of the Standard Industrial Classification*, which was issued as a working manual in July, 1957. It is designed to be used in conjunction with *Guide to the Commodity Statistics of the Industry and Merchandising Division*. In that manual, the contents have been arranged so that the principal products of different industries follow each other, so far as is practicable, in approximately the same order as the industries concerned follow in the standard industrial classification.

The presentation of data in this manual is based on individual industries and publications. The first column of each line gives the standard industrial classification code for an industry. This is a three-figure number in all cases. In the "remarks" column, some four-figure industry codes are given. These are from a more detailed breakdown of the S.I.C. which is used within the Industry and Merchandising Division. With one exception (noted on page 21 of this text) the first three figures are those of the S.I.C., and the fourth indicates a sub-group made by the Division.

The second column gives the name of the industry, and also gives the names of main groups of industries as headings. The third column states whether significant data covering the whole industry can be obtained from published material.

The fourth column gives the list number used in *Current Publications* for the publication containing the data. This pamphlet, which is obtainable free of charge from the Information Services Division, gives the prices of publications and explains how to order them. Reference to *Current Publications* might also reveal the existence of monthly or other relevant series listed near the item concerned.

The fifth column gives the title of the publication containing the data. Where a publication covers more than one industry, the portion of it relevant to the industry concerned is indicated in column six. Publications which are referred to more than once are marked with an asterisk.

The seventh column contains any necessary remarks. It also indicates in which of the Division's subject-matter fields the statistics concerned are included. Against the title of the major group is given the name of the field primarily concerned. Unless otherwise stated, all industries within a major group are handled in the field so named.

Within the Industry and Merchandising Division there is a statistician responsible for each subject-matter field.

Guide to Publications of the Industry and Merchandising Division Which Delimit Sub-Groups of the Standard Industrial Classification contained references to the nine sections by which the Division was organized. The field previously covered by the Animal Products Section has since been distributed between two other fields—Foods and Beverages, and Textiles and Miscellaneous Products. The field previously covered by the Merchandising and Services Section has been divided into two new fields—Retail Trade, and Wholesale Trade and Services. The field previously covered by the Forestry Section has been divided into two new fields—Forestry, and Wood and Paper Products. Of the present fields, four are the responsibility

of sections which handle both the subject-matter and the operation of the surveys. These are Forestry, Fisheries, Minerals and Inventories. The remaining six fields each have a statistician responsible for subject-matter, the operations being pooled. These six fields are Foods and Beverages, Metal and Chemical Products, Textiles and Miscellaneous Products, Wood and Paper Products, Retail Trade, and Wholesale Trade and Services.

The use of this manual by anyone who is working from the standard industrial classification is self-explanatory. It can also be used by the reader of an annual publication to find out how its contents are related to the S.I.C. Care is, however, necessary in this case, because one publication may be mentioned several times in connection with different industries. The asterisk indicates the need for caution in such a case.

Industrial Statistics of the Industry and Merchandising Division

- 9 -

S.I.C. code	Industry	Whether covered individually in publications	Catalogue number	Title of publication	Section of publication	Remarks
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Logging:						
080	Logging		25 - 201	<i>Operations in the Woods</i>		Forestry Estimates of quantity and value of production.
Fishing:						
091	Inland fishing		24 - 201	<i>Fisheries Statistics of Canada*</i>	Data stated separately in various tables.	Fisheries Data available on quantity and value of catch, and on men employed and equipment used.
093	Sea fishing		24 - 201	<i>Fisheries Statistics of Canada*</i>	Data stated separately in various tables.	
Metal Mining:						
101	Alluvial gold mining	Yes	26 - 209	<i>The Gold Mining Industry*</i>	The Alluvial Gold Mining Industry	Minerals
103	Auriferous quartz mining	Yes	26 - 209	<i>The Gold Mining Industry*</i>	The Auriferous Quartz Mining Industry	
107	Copper - gold - silver mining	Yes	26 - 209	<i>The Gold Mining Industry*</i>	The Copper - Gold - Silver Mining Industry	
109	Iron mining	Yes	26 - 210	<i>The Iron Mining Industry</i>		
114	Nickel - copper mining	Yes	26 - 201	<i>General Review of the Mining Industry</i>	Principal Statistics, Nickel - copper mines	Industry 114 is merged with a part of smelting and refining (industry 345) in <i>The Nickel - Copper Mining, Smelting and Refining Industry</i> . Separate data on man-hours are shown there.
116	Silver - cobalt mining	Yes	26 - 216	<i>The Silver - Lead - Zinc Mining Industry*</i>	The Silver - Cobalt Mining Industry	
117	Silver - lead - zinc mining	Yes	26 - 216	<i>The Silver - Lead - Zinc Mining Industry*</i>	The Silver - Lead - Zinc Mining Industry	
119	Miscellaneous metal mining	Yes	26 - 219	<i>The Miscellaneous Metal Mining Industry*</i>	From industry totals, as given, deduct iron ore mining	Tonnage of ore is not delimited.

* In this manual, an asterisk indicates that a publication is referred to more than once.

Industrial Statistics of the Industry and Merchandising Division - Continued

S.I.C. code	Industry	Whether covered individually in publications	Catalogue number	Title of publication	Section of publication	Remarks
(1)	(2)	(3)	(4)	(5)	(6)	(7)
	Metal Mining - Concluded:					
	Fuels:					
121	Coal mining	Yes	26 - 206	<i>The Coal Mining Industry</i>		Minerals
123	Natural gas	No	26 - 213	<i>The Crude Petroleum and Natural Gas Industry*</i>	The Natural Gas Industry	Combined total for industries 123 and 124 is available from the use of three publications
124	Oil (petroleum) crude	No	26 - 213	<i>The Crude Petroleum and Natural Gas Industry*</i>	The Crude Petroleum Industry	
126	Oil shale or bituminous sand	No	26 - 207	<i>Contract Drilling in the Mining Industry*</i>	Contract Drilling for Fuels	
	Non-Metal Mining:					
131	Asbestos mining	Yes	26 - 205	<i>The Asbestos Mining Industry</i>		Minerals
133	Gypsum mining	Yes	44 - 208	<i>The Gypsum Industry*</i>	The Gypsum Mining Industry	
137	Salt	No	26 - 214			Data combined with those for manufacture of commercial salt (industry 3693) in <i>The Salt Industry*</i>
139	Miscellaneous non-metal mining	Yes	26 - 220	<i>The Miscellaneous Non-Metal Mining Industry</i>		Four publications needed to arrive at the total
			26 - 208	<i>The Feldspar and Quartz Industry</i>		
			26 - 212	<i>The Peat Industry</i>		
			26 - 218	<i>The Talc and Soapstone Industry</i>		

Quarrying, Clay and Sand Pit:			See remarks		
153	Granite quarries (igneous rocks)				
				Minerals	Combined data for industries 153 and 157 are given in <i>The Stone Industry</i> ,* section on the quarrying industry.
157	Limestone, sandstone and slate (including marble) quarries (sedimentary rocks)		See also industry 153		The mining of limestone used for making lime or cement is included with industry 366 or industry 363.
159	Sand and gravel pits or quarries	Yes	26 - 215	<i>The Sand and Gravel Industry</i>	The mining of clay used for clay products is included with industry 364
	Prospecting:				Minerals
172	Metal prospecting	No			
174	Oil prospecting	No			
179	All other prospecting	No			
	Foods and Beverages:				Foods and Beverages
200	Slaughtering and meat packing	Yes	32 - 221	<i>The Slaughtering and Meat Packing Industries</i>	
201	Butter and cheese factories	Yes	32 - 209	<i>The Dairy Products Industries*</i>	Cost of fuel and electricity is published as a combined figure for industries 201 and 203
203	Concentrated milk	Yes	32 - 209	<i>The Dairy Products Industries*</i>	The Dairy Factory Industry (tables 16 & 17)
207	Process cheese	Yes	32 - 210	<i>The Process Cheese Industry</i>	Also included in Dairy Products Industries*
209	Other dairy products	Yes	32 - 209	<i>The Dairy Products Industries*</i>	The Ice Cream Industry
210	Canned and cured fish	Yes	32 - 216	<i>The Fish Processing Industry</i>	Fisheries
212	Canned and preserved fruit and vegetables	Yes	32 - 218	<i>The Fruit and Vegetable Preparations Industry</i>	
213	Feed and chopping mills	Yes	32 - 214	<i>The Feeds Industry*</i>	Principal Statistics of Firms Classified as Chopping Mills (table 1b)
214	Flour mills	Yes	32 - 215	<i>The Flour Milling Industry</i>	

Industrial Statistics of the Industry and Merchandising Division - Continued

(1)	(2)	(3)	(4)	(5)	(6)	(7)
	Foods and Beverages—Concluded:					
215	Prepared breakfast foods	Yes	32-204	<i>The Prepared Breakfast Foods Industry</i>		Foods and Beverages
216	Prepared stock and poultry feed	Yes	32-214	<i>The Feeds Industry*</i>	Principal Statistics of Firms Classified as Manufacturers of Prepared Feeds (table 1c)	
218	Biscuits and crackers	Yes	32-202	<i>The Biscuit Industry</i>		
219	Bread and other bakery products	Yes	32-203	<i>The Bread and Other Bakery Products Industry</i>		
220	Carbonated beverages	Yes	32-208	<i>The Carbonated Beverages Industry</i>		
221	Distilled liquors	Yes	32-206	<i>The Distilling Industry</i>		
222	Malt liquors	Yes	32-205	<i>The Brewing Industry</i>		
224	Wines	Yes	32-207	<i>The Wine Industry</i>		
225	Confectionery	Yes	32-213	<i>The Confectionery Industry</i>		
227	Sugar	Yes	32-222	<i>The Sugar Refining Industry</i>		
228	Miscellaneous foods, n.e.c.	Yes	32-224	<i>The Miscellaneous Food Preparations Industry</i>		Industries 2281, 2284 and 2285
			32-219	<i>The Macaroni and Kindred Products Industry</i>		Industry 2283
230	Tobacco and Tobacco Products: Tobacco and tobacco products	Yes	32-225	<i>The Tobacco and Tobacco Products Industries</i>		Textiles and Miscellaneous Products
236	Rubber Products: Rubber footwear	No	33-206	<i>The Rubber Products Industry</i>		Textiles and Miscellaneous Products
239	Tires, tubes and other rubber products (except rubber footwear)	No				Covers industries 236 and 239 combined

Leather Products:			Textiles and Miscellaneous Products
241	Boots and shoes, except rubber	Yes	33 - 203
			<i>The Leather Footwear and Leather Boot and Shoe Findings Industries*</i>
243	Boot and shoe repair	No	
245	Leather gloves and mittens	Yes	33 - 204
			<i>The Leather Glove and Mitten Industry</i>
247	Leather tanneries	Yes	33 - 202
			<i>The Leather Tanning Industry</i>
			Industry 2471
			Industry 2472
249	Miscellaneous leather products	Yes	33 - 205
			<i>The Miscellaneous Leather Products and the Leather Belting Industries*</i>
			<i>The Miscellaneous Leather Products Industry</i>
			Industry 2491
			Industry 2492
Textile Products (except clothing):			Textiles and Miscellaneous Products
251	Cotton thread	Yes	34 - 205
			<i>The Cotton Textile Industries*</i>
252	Cotton yarn and broad woven goods	Yes	34 - 205
			<i>The Cotton Textile Industries*</i>
254	Miscellaneous cotton goods	Yes	34 - 205
			<i>The Cotton Textile Industries*</i>
255	Woollen and worsted woven goods	Yes	34 - 209
			<i>The Wool Textile Industries*</i>
257	Woollen and worsted yarn	Yes	34 - 209
			<i>The Wool Textile Industries*</i>
259	Miscellaneous woollen goods	Yes	34 - 209
			<i>The Wool Textile Industries*</i>
260	Rayon, nylon and silk textiles	Yes	34 - 208
			<i>Synthetic Textiles and Silk Industry</i>
261	Dyeing and finishing of textiles	Yes	34 - 206
			<i>The Dyeing and Finishing of Textile Goods Industry</i>
262	Laces, tapes and bindings	Yes	34 - 207
			<i>The Narrow Fabrics Industry</i>

GUIDE TO PUBLICATIONS OF THE INDUSTRY AND
MERCHANDISING DIVISION WHICH DELIMIT
SUB-GROUPS OF THE STANDARD
INDUSTRIAL CLASSIFICATION

A WORKING MANUAL

DOMINION BUREAU OF STATISTICS

Industry and Merchandising Division

OTTAWA, CANADA

July, 1957

FOREWORD

This Working Manual is the second of its type to be prepared by the Dominion Bureau of Statistics, and as such is to some extent experimental.

We are conscious of the need for providing all potential users of our statistics with the fullest information about what is available. In this manual, we take another step forward by showing which of the industries defined in the standard industrial classification are covered by data published by the Industry and Merchandising Division.

This guide was prepared by Mr. R.J. Loosmore, Assistant to the Director of that Division.

WALTER E. DUFFETT

Dominion Statistician

July, 1957

TABLE OF CONTENTS

Major group of industries:	Page

Products of petroleum and coal	17
Chemical products	18
Miscellaneous manufacturing industries	19
Wholesale trade	20
Retail trade	22
Recreation service	25
Business service	25
Personal service	26

GUIDE TO PUBLICATIONS OF THE INDUSTRY AND MERCHANDISING DIVISION WHICH DELIMIT SUB-GROUPS OF THE STANDARD INDUSTRIAL CLASSIFICATION

This guide was designed to assist users of the Division's publications who may wish to compile annual data according to the sub-groups of the Standard Industrial Classification. For this purpose, it can be used in conjunction with the manufacturing sections of the companion loose-leaf volume, *Guide to the Commodity Statistics of the Industry and Merchandising Division (other than Census of Industry)*.

The Industry and Merchandising Division compiles statistics in a number of major groups of the Standard Industrial Classification. These consist of all major groups in the divisions of mining, manufacturing and trade, together with the major groups, logging, fishing, business service and personal service. All industries within these groups are listed in this guide. Information is given on any annual reports which delimit these industries. In the case of the merchandising and service trades, monthly publications are also listed, and in addition to the material outlined in this memorandum, this sector is covered fully in the Decennial Census of Distribution.

The first column of each line gives the Standard Industrial Classification code for the industry concerned. This is a three-figure number in all cases. In the "remarks" column, some four-figure industry codes are given. These are from a more detailed breakdown of the S.I.C. which is used within the Industry and Merchandising Division. With one exception (noted on page 19 of this text) the first three figures are those of the S.I.C., and the fourth indicates a sub-group made by the Division.

The second column gives the name of the industry, and also gives the names of main groups of industries as headings. The third column states whether the industry is delimited in a publication. That is to say, whether significant data covering the whole industry can be obtained from published material.

In the case of mining or manufacturing, an industry is recorded as delimited if the principal statistics of the industry are published as such, or can be built up from published material. The principal statistics of a manufacturing industry consist of data on the number of establishments, the number of employees and their earnings, the cost of materials used, the cost of fuel and electricity used, the value added by manufacture, and the selling value of factory shipments. In the case of mines, the principal statistics consist of data on the number of establishments, the number of employees and their earnings, the cost of fuel and electricity

used, the cost of process supplies and containers, the net value added by processing, and the gross value of production.

The fact that the principal statistics are delimited does not, of course, necessarily mean that all statistics relating to the industry are also thus delimited. In the case of the merchandising and service trades, an industry is recorded as delimited if the value of sales is available. Other relevant information available for the industry as such is also recorded in some cases.

Some industries are not thus delimited. In some cases, such as photography, there are no statistics collected. In other cases, such as rubber footwear, the statistics for the industry may be merged with those of another; in this case, tires, tubes and other rubber products.

The fourth column gives the list number used in *Current Publications 1956* for the publication containing the data. This is included to help people find the price of the publication. Reference to *Current Publications* might also reveal the existence of monthly or other relevant series listed near the item concerned.

The next three columns give the volume number, part number, and section letter of the Division's annual publications for 1955. These identify the publication within the Division's own system of reference. They also facilitate cross references to the commodity statistics guide.

The eighth column gives the titles of the publications concerned. Where a publication covers more than the industry concerned, the portion of it relevant to that industry is indicated in column nine. Publications which are referred to more than once are marked with an asterisk.

The tenth column contains any necessary remarks. It also indicates which section of the Division is responsible for the statistics concerned. Against the title of the major group is given the name of the section primarily concerned with it. Unless otherwise stated, all industries within a major group are handled by the section so named.

The use of the manual by anyone who is working from the Standard Industrial Classification is self-explanatory. It can also be used by the reader of an annual publication to find out how its contents are related to the S.I.C. This can be done by using the volume, part and section reference. The memorandum does not list these precisely in order,

but they are in sufficient order to make a speedy reference practicable. Once the publication has been located in the memorandum, information about related publications and industries can be obtained. Care is, however, necessary in this case. One publication may be mentioned several times in connection with different industries, in which case the asterisk indicates the need for caution.

Cross-references can be made with the commodity statistics guide. A reader of this volume, having found out which publication covers a particular industry, may be interested in finding out if any relevant commodity statistics are available apart from the Census of Industry. This can be done by finding the volume, part and section, and looking for this reference in the contents list of the com-

modity statistics guide. Relevant material, if any, will be listed on the pages concerned. For instance, a man interested in coal mining (industry 121) would find from this memorandum that the industry is covered by *The Coal Mining Industry*, which is Volume 1, Part 1, Section G, of the Industry and Merchandising Division's annual publications. The contents list of the commodity statistics guide shows that this section is covered on pages 8 to 10. Perusal of these pages gives the picture on statistics of coal available elsewhere than in *The Coal Mining Industry*. In this particular case, they are all monthly ones.

This guide was prepared by Mr. R.J. Loosmore, Assistant to the Director of the Industry and Merchandising Division.

July, 1957.

Publications of the Industry and Merchandising Division Which Delimit Sub-Groups of the Standard Industrial Classification

S.I.C. code	Industry	Whether delimited in publications	Publication				Section of publication	Remarks	
			List number	I. and M. Div.	Title				
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Logging:

GUIDE TO THE COMMODITY STATISTICS OF THE
INDUSTRY AND MERCHANDISING DIVISION
JANUARY, 1959

A WORKING MANUAL

Published by Authority of

The Honourable Gordon Churchill, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS

Industry and Merchandising Division

May, 1959
6503-502

Price 50 cents

FOREWORD

This Working Manual is a revision of *Guide to the Commodity Statistics of the Industry and Merchandising Division (Other than Census of Industry)*, which was issued in July, 1957.

In the Dominion Bureau of Statistics, we are conscious of the need for providing all potential users of our data with full information about the material available. This study of those statistics of the Industry and Merchandising Division which deal with commodities was designed to assist in that aim.

This guide was prepared by Mr. R.J. Loosmore, Assistant to the Director of the Industry and Merchandising Division.

Current Publications, which is obtainable free of charge from the Information Services Division, gives the prices of publications mentioned in this guide and explains how to order them.

February, 1959.

WALTER E. DUFFETT,
Dominion Statistician.

Petroleum products	28
Chemicals and allied products	30
Musical instruments	31

GUIDE TO THE COMMODITY STATISTICS OF THE INDUSTRY AND MERCHANDISING DIVISION JANUARY, 1959

The framework of the activities of the Industry and Merchandising Division consists of regular annual surveys. The main one is the Census of Industry which covers manufacturing, mining, forestry and fisheries. Ancillary to this is the survey of manufacturing shipments and inventories. Another major group of annual and biennial surveys covers wholesale and retail trade, together with a number of service trades.

A great deal of information about individual commodities is provided by the Census of Industry. For most industries, considerable detail is given both on the products made, and on the materials used. Information on a commodity basis is also being increasingly sought in the Division's other annual surveys.

Commodity data collected from manufacturers in the course of the Census of Industry are collated by means of a detailed card index system for products made and materials used. Data on shipments of individual commodities are given in *General Review of the Manufacturing Industries of Canada*, and in *Preliminary Statement of Manufactures*.

The range of data collected by the Industry and Merchandising Division outside its annual census work is considerable. Most of the surveys concerned are monthly ones which provide data for a number of purposes. In some cases, a government department may need the figures. In most cases, the results of surveys are published, and this increases general knowledge of the working of the economy. The monthly coal statistics, for example, are used by the Dominion Coal Board for administrative purposes, but they are also of general interest.

Some series are collected primarily for the economist. The monthly telegraphic reports on the production of steel and automobiles, for instance, provide valuable indicators of current economic activity.

Some information is collected by special annual surveys in order to provide an early estimate of production, in advance of the regular Census of Industry reports. The annual production of certain minerals, for instance, is asked for on a special early schedule so that the *Preliminary Estimate of Canada's Mineral Production* can be published a day or so after the end of the year in question. Data for some other minerals covered by this publication are obtained from the monthly reports. In other cases, a special survey may be used to obtain an early figure for the annual production of a commodity, such as sulphuric acid or vacuum cleaners. Special

surveys may also be made for specific purposes, such as the sales of pest control products (annual) or the use of chemicals by municipal waterworks (biennial). Other data are collected at varying intervals.

Although most of the data are published, there is a good deal of unpublished information, all of which is used by one or more groups of persons. In some cases, the data from an individual survey are combined with other material in D.B.S. for a specific purpose. In all other cases, at least one government department is likely to be interested. In many cases, the tabulated results of the survey are made available to the respondents.

This manual provides a systematic guide to those commodity statistics of the Division which do not form part of the regular annual Census of Industry. Commodity statistics are regarded here as those which apply to a specified commodity or group of commodities, and are collected as such. Statistics of an industry, which is itself defined in terms of commodities, are not regarded as commodity statistics.

This guide replaces *Guide to the Commodity Statistics of the Industry and Merchandising Division (other than Census of Industry)*, which was issued as a working manual in July 1957. It is designed to be used in conjunction with *Guide to the Industrial Statistics of the Industry and Merchandising Division*. The contents have been arranged in such a way that the principal products of different industries follow each other in approximately the same order as the industries concerned do in the other publication, which lists them according to the standard industrial classification.

The presentation of information in this manual is based on the schedule used for collecting the commodity data, or an alternative medium such as regular telegrams or letters. For each schedule, a summary of the data collected is given in the left-hand column. The next column lists the concepts covered. A reader interested mainly in production, for instance, could scan this column and check any line dealing with that concept. The third column shows the periodicity. Here the reader could scan for monthlies only, for example. The fourth column indicates whether the data are available in terms of quantity, value or both.

The fifth column gives the name of the schedule concerned. Users of statistics might find it useful to obtain blank copies of forms used within their fields of interest, as this gives a good idea of what

data are likely to exist and of the instructions which were given to respondents. Of course, not all the information which is collected can be made available, because the interests of individual firms must be protected.¹ The sixth column shows where the published data are to be found. The reference numbers given here are those used in *Current Publications*, a pamphlet which lists D.B.S. publications, their prices, and the procedure for ordering them. It is obtainable free of charge from the Information Services Division. In cases where a publication is referred to more than once in this memorandum, an asterisk appears after its name. The seventh column gives any necessary comments.

At the top of each page, in the seventh column, is the name of the subject-matter field in which are

included the surveys described on that page. In some cases, a survey described lower down on the page lies within a different field, which is named opposite the survey. Within the Industry and Merchandising Division there is a statistician responsible for each subject-matter field.

Guide to the Commodity Statistics of the Industry and Merchandising Division (other than Census of Industry), contained references to the nine sections by which the Division was organized in 1957. The field previously covered by the Animal Products Section has since been distributed between two other fields - Foods and Beverages, and Textiles and Miscellaneous Products. The field previously covered by the Merchandising and Services Section has been divided into two new fields - Retail Trade, and Wholesale Trade and Services. The field previously covered by the Forestry Section has been divided into two new fields - Forestry, and Wood and Paper Products. Of the present fields, four are the responsibility of sections which handle both the subject-matter and the operation of the surveys. These are Forestry, Fisheries, Minerals and Inventories. The remaining six fields each have a statistician responsible for subject-matter, the operations being pooled. These six fields are Foods and Beverages, Metal and Chemical Products, Textiles and Miscellaneous Products, Wood and Paper Products, Retail Trade, and Wholesale Trade and Services.

¹ The Statistics Act, Sub-Sections 15(1) and 15(2) states: -
"15. (1) No individual return and no part of an individual return made, and no answer to any question put, for the purposes of this Act, shall, without the previous consent in writing of the person or of the owner for the time being of the undertaking in relation to which the return or answer was made or given, be published, nor, except for the purposes of a prosecution under this Act, shall any person, other than a person employed by the Bureau or working under arrangement with the Bureau and sworn under section 6, be permitted to see any such individual return, part or answer".
"15. (2) No report, summary or statistics or other publication under this Act shall contain any of the particulars comprised in any individual return so arranged as to enable any person to identify any particulars so published as being particulars relating to any individual person or business."

Commodities	Concepts covered	Periodicity	Measured by quantity or value	Schedule used	Name of D.B.S. publication	Remarks
LOGGING:						
Pulpwood , in block pile, cut or purchased prior to June 1 and consumption at mill by cords of 85 cubic feet of solid wood; limit pulpwood cut and pulpwood purchased after June 1 and delivered to block pile or consumed direct in thousands of board feet or rough cords of 128 cu. ft.	Inventories Production Purchases Consumption	Monthly	Q	Monthly Pulpwood Production, Consumption and Inventories	<i>Pulpwood Production, Consumption and Inventories*</i> (25-001) gives provincial figures in rough cords	Forestry Production figures include returns by exporters to Dept. of T. & C. as well as returns by pulp mills to D.B.S. The provincial consumption and inventory figures include imports from other provinces or countries. B.C. figures are included although they are collected on a separate schedule.
Sawmill and veneer mill chips, slabs and edgings and other wood-waste consumed as pulping material by kind, unit of measure and quantity; also sources of pulpwood both limit and purchased	Consumption	Monthly	Q	As above	Not published	
Pulp logs held at pulp mill; cut or purchased but not delivered to the mill; consumed at the mill. Sawmill chips consumed and logs for pulping cut or purchased after January 1. All by quantity.	Production Purchases Consumption Inventories	Monthly	Q	Monthly Pulp Log Report	Provincial figures in <i>Pulpwood Production, Consumption and Inventories*</i> (25-001)	Special schedule for British Columbia
Logs held at pulp mill; owned but not delivered to mill; by value.	Inventories	Monthly	V	Monthly Inventory Shipments and Orders Survey, Shipments, Inventories and Orders Survey	Not published	Inventories
Pulpwood , estimated future production, by 3 channels of procurement, by province, by Crown and freehold lands.	Future production	As required	Q	Estimated Pulpwood Production	Not published	First survey was in June, 1958, to cover period from 1 June 1958 to 31 May 1959. It was repeated in October 1958 to cover the same period. Survey is experimental.
FISHING:						
Fish sold by fishermen, by species and sizes; quantity, price for which sold,	Sales price	Continuous	Q V	Fisherman's Sales Slip		Fisheries Used by fishermen in the Maritimes to report sales of their catch.
Lake and river fish , 17 kinds, sea fish (caught inland) 7 kinds by quantity and value for landings; and by quantity for disposition of each fish by type of product, and of caviar.	Landings Disposition	Monthly	Q V Q	Inland Fisheries Monthly Report of Production Statistics	Landings only by provinces, in <i>Monthly Review of Canadian Fisheries Statistics*</i> (24-002)	

*In this manual, an asterisk indicates that a publication is referred to more than once.

Commodities	Concepts covered	Periodicity	Measured by quantity or value	Schedule used	Name of D. B. S. publication	Remarks
FISHING — Concluded:						
Fish , by species and market form, purchased from fishermen, by quantity and value; also gear used	Purchases	Monthly	Q V	Supplementary Purchase Slip - A		Fisheries Used by fisheries officers in Maritimes for recording purchases of fish from fishermen when regular purchase slips are not obtainable.
Name and address of buyer, place where fish bought; form in which fish or shellfish are landed, weights of units of measure, and price; all by species.				Purchase Slip Guide		To be completed for each fish buyer by the fisheries officer when he collects purchase slips.
Fish processed by fishermen, fresh fish sales, fresh fish used as bait and other landings; all by weight, species and market form, and price per pound, also gear used.	Processed Sales Use	Monthly	Q	Supplementary Purchase Slip - B		Used by fisheries officers to report all fish landings which were not recorded in a fresh state.
METALS MINED, SMELTED AND REFINED:						
Ore hoisted, ore milled and waste material sorted and discarded, by short tons.	Production Waste	Monthly	Q	Monthly Report of Mineral Production	Production in <i>Production of Canada's Leading Minerals*</i> (26-007). Production of gold, by province and type of mine in <i>Gold Production</i> (26-004). Production and exports of silver and exports of lead and zinc in <i>Silver, Lead and Zinc Production</i> (26-008). Exports of copper and nickel in <i>Copper and Nickel Production*</i> (26-003)	Minerals
Gold and silver bullion, by fine ounces.	Production Shipments	Monthly	Q	As above		
Ore , nine types, by tons; metallic content in ounces (gold & silver) or pounds (copper, lead, zinc, nickel cobalt, sulphur).	Domestic shipments Exports	Monthly	Q	As above		
Ores and concentrates , nine types, metallic content in ounces (gold, silver) or pounds (copper, lead, zinc, arsenic, tungsten, sulphur).	Domestic shipments Exports	Monthly	Q	Monthly Report of Mineral Production	As above	Alternative version, for use with Government of Quebec.
Gold and silver bullion, by fine ounces.	Production	Annual	Q	Annual Estimate of Canadian Mineral Production for the Calendar year	Production (metallic content) in <i>Preliminary Estimate of Canada's Mineral Production*</i> (26-202). Gold production by provinces and areas, silver production and exports, production of remainder in <i>Preliminary Report on Mineral Production*</i> (26-203)	
Ores and concentrates , nine types, by tons; metallic content in ounces or pounds.	Domestic shipments Exports	Annual	Q	As above		

Ore hoisted and treated by copper mines. Metal content of anodes made. Pyrite shipped, by quantity and by sulphur content.	Production Shipments	Monthly	Q	Report of Mineral Production	Some data incorporated in <i>Copper and Nickel Production*</i> (26-003)	Joint form with Government of Quebec.
Iron ore mined, shipped to Canada and abroad, beneficiated; beneficiated ore shipped to Canada and abroad, stocks at month-end; all by quantity.	Production Domestic shipments Exports Stocks	Monthly	Q	Report on Shipments of Canadian Iron Ore	Shipments of ore for Canada and abroad in <i>Iron Ore</i> (26-005) Production in <i>Production of Canada's Leading Minerals*</i> (26-007)	
Pyrite concentrates received and treated by quantity and by sulphur content; sulphur and sulphur dioxide shipped; iron ore or residue on hand, produced, shipped to Canada and abroad; all by quantity.	Production Receipts Shipments Inventories	Monthly	Q	Production Shipments and Stocks of Pyrite, Iron Ore, Sulphur	Data for iron ore as above	
Molybdenum ore mined and treated, by tons; molybdenite concentrates produced, shipped, and stocked by pounds and by molybdenum content; bismuth concentrate produced and shipped, by pounds	Production Shipments Inventories	Monthly	Q	Monthly Report by Producers of Molybdenum	Annual data in <i>The Miscellaneous Metal Mining Industry*</i> (26-219)	
Tungsten ore drawn, shipped, by tons. Ores and concentrates received, treated, on hand; concentrates produced, shipped, on hand; by quantity and by tungsten content.	Production Shipments Inventories	Monthly	Q	Monthly Report by Producers of Tungsten	Annual production in <i>The Miscellaneous Metal Mining Industry*</i> (26-219)	
Aluminum ingot , refined copper , lead and nickel ; zinc slab, aluminum , semi-fabricated, ferro alloys, all by tons; antimony in antimonial lead, crude arsenic , refined arsenic , bismuth , calcium and cobalt metal, cadmium , black cobalt oxide , amorphous cobalt sulphate , magnesium metal , molybdenum , nickel salts, nickel oxide , selenium tellurium and tungsten all by pounds, fine silver bullion by ounces.	Production Domestic shipments Exports Inventories	Monthly	Q	Statistical Report on Selected Metals	Not published	
Calcium metal , production, shipments to Canada and overseas, stocks, by pounds	Production Shipments Inventories	Monthly	Q	Monthly Report by Producers of Calcium Metal	Annual production in <i>The Miscellaneous Metal Mining Industry*</i> (26-219)	
Magnesium metal , production, shipments to Canada and overseas, stocks, by pounds	Production Shipments Inventories	Monthly	Q	Monthly Report by Producers of Magnesium Metal	As above	
Secondary non-ferrous ingot , copper base alloys by type and 9 other classes	Production Domestic shipments Exports Use Inventories	Quarterly	Q	Report by Producers of Secondary Non-ferrous Ingot	Production, used or sold, stocks of 9 classes published quarterly in <i>Non-Ferrous Scrap Metal and Secondary Non-Ferrous Ingot*</i> (41-007)	
Sundry products.	Production Domestic shipments Exports Inventories	Monthly	Q	Leading smelters receive questionnaires based on their particular activities	Data consolidated with others, and included in various publications	

Commodities	Concepts covered	Periodicity	Measured by quantity or value	Schedule used	Name of D.B.S. publication	Remarks
METALS MINED, SMELTED AND REFINED -- Concluded:						
Broken ore in mines and stockpiles at mine, by tons.	Inventories	Annual	Q	Year-End Inventories, Metal Mining		Minerals
Ore under process in smelter, by equivalent tons.						Inventories
Ore, concentrates, refined metals (type specified) held by smelters, by quantity.						
Ore, concentrates and refined metals ready for shipment for refining or for sale; also held by mint or other custom smelter or refinery in Canada, by pounds or ounces of refined metals.	Inventories	Quarterly	Q	Quarterly Inventories, Metal Mining		Inventories
COAL:						
Coal, output by tons. Price ranges for each type and size.	Production Prices	Monthly	Q	Preliminary Estimate of Coal Output and Prices	Production in Preliminary Report on Coal Production* (26-002)	Minerals
Coal, production from underground mines and from strip mines	Production	Monthly	Q	Nova Scotia Coal Operators' Monthly Statement. New Brunswick Coal Operators' Monthly Statement; Saskatchewan Coal Operators' Monthly Statement; Alberta Coal Operators' Monthly Statement; British Columbia Coal Operators' Monthly Statement	Production by province and 3 types of coal in Coal and Coke Statistics* (45-002)	
Coal, 6 kinds, disposed of through 8 channels, by tons; total for each channel by value and by tons; stocks on bank and in contractor's hands, by tons.	Shipments Use Inventories	Monthly	Q V	As above	Not published monthly. Disposition given annually by province in Preliminary Report on Coal and Coke Statistics* (45-202). Disposition by province and by type of coal given annually in The Coal Mining Industry* (26-206)	
Coal, 6 kinds, lifted from bank and waste heap, by tons, and value of total.	Inventories	Monthly	Q V	As above	As above	

Coal, 6 kinds by destination (provinces, other countries, railroads, bunkers, lost at sea), by tons.	Shipments	Monthly	Q	As for previous items	Exports and interprovincial shipments in <i>Coal and Coke Statistics</i> * (45-002). Annual totals by type of coal given in <i>Preliminary Report on Coal and Coke Statistics</i> * (45-202). Annual totals by type of coal and province of origin given in <i>The Coal Mining Industry</i> * (26-206)	Details vary from province to province.
Coal, Canadian, 4 types, and briquettes; coal, U.S., 8 types, and briquettes; coal, other imported, 3 types; coke (except petroleum), Canadian and U.S., and petroleum coke —Sales of the above by retail fuel dealers in Ontario and points east, also in Winnipeg; inventories; all by tons.	Sales, retail Inventories	Monthly	Q	Fuel Dealer's Monthly Statement	Published in <i>Coal and Coke Statistics</i> * (45-002) and in <i>The Coal Mining Industry</i> * (26-206) except that only 3 types of Canadian coal shown, and coke shown without country of origin	
Coal, Canadian, 4 types, and briquettes; coal, U.S. (dealers to specify type)—Sales of the above by retail fuel dealers in Manitoba (excluding Winnipeg) and points west; inventories; all by tons.	Sales, retail Inventories	Monthly	Q	Fuel Dealer's Monthly Statement	As above	
Coal, Canadian, 2 types and briquettes; coal, U.S., 9 types; coal, other imported, 4 types; coke (except petroleum), Canadian and U.S., petroleum coke , other coke —Retail sales of the above by dock operators by size and by tons.	Sales, retail	Monthly	Q	Dock Operator's Monthly Statement—Retail Sales	Not published separately. Figures are added in with those of other retail dealers	
Coal, Canadian, 4 types, and briquettes; coal, U.S., 9 types, and briquettes; coal, other imported, 4 types; coke (except petroleum), Canadian and U.S., petroleum coke , other coke —Wholesale sales of the above by certain dock operators in the Maritimes, and inventories held, by tons.	Sales, wholesale Inventories	Monthly	Q	Dock Operator's Monthly Statement—Wholesale Sales	Not published	Other wholesale dock operators are covered by Dominion Coal Board on form D.C.B. 250
Coal, Canadian, U.S. or British, sales at docks and inventories held for ships' bunkering by tons.	Sales, wholesale Inventories	Monthly	Q	Monthly Bunker Coal Statement	Not published	
Coal, Canadian, 4 types; U.S., 9 types; other imported, 4 types; coke (except petroleum), Canadian and U.S., petroleum coke ;—Consumption by industrial consumers and inventories held, by trade name, mine or district of origin, by tons and by cost per ton.	Consumption Inventories Cost per ton	Monthly	Q V	Industrial Consumer's Monthly Coal Statement	Industrial consumption figures, by type of coal and area in which used, in <i>Coal and Coke Statistics</i> * (45-002). Annual totals in <i>The Coal Mining Industry</i> * (26-206). Inventories not published	
Coal, anthracite, bituminous (including lignite), briquettes, and coke; landed imports by provinces, by tons.	Landed imports	Monthly	Q	Information sent by telegram by customs authorities	Monthly figures given in <i>Pre-liminary Report on Coal Production</i> * (26-002). <i>Coal and coke</i> and <i>bituminous coal</i> in monthly <i>Coal Statistics</i> * (45-002). Annual figures given in <i>The Coal Mining Industry</i> * (26-206)	Information collected by Dominion Coal Board. <i>Pre-liminary Report on Coal Production</i> * (26-002). <i>Coal and coke</i> and <i>bituminous coal</i> in monthly <i>Coal Statistics</i> * (45-002). Annual figures given in <i>The Coal Mining Industry</i> * (26-206)

Coal used by coke producers.

Commodities	Concepts covered	Periodicity	Measured by quantity or value	Schedule used	Name of D.B.S. publication	Remarks
CRUDE PETROLEUM AND NATURAL GAS:						
Crude oil used by refineries						
						Minerals
						See Refined Petroleum Products (45-204)
Crude petroleum (excluding natural gasoline) produced by 6 provinces and Northwest Territories, with breakdown by fields for Alberta. Natural gasoline by fields for Alberta.	Production	Monthly	Q	Provincial data	<i>Crude Petroleum and Natural Gas Production*</i> (26-006). Totals in <i>Production of Canada's Leading Minerals*</i> (26-007)	
Natural gas produced in 5 provinces and Northwest Territories.	Production	Monthly	Q	Provincial data	<i>Crude Petroleum and Natural Gas Production*</i> (26-006). <i>Production of Canada's Leading Minerals*</i> (26-007)	
NON-METALLIC MINERALS:						
						Minerals
Non-metallic minerals, asbestos and barytes , 2 types each; beryl ; diatomite ; feldspar , 2 types; fluorspar ; garnet ; graphite ; grindstones ; gypsum by 5 provinces; iron oxides , 2 grades; lithium minerals ; kaolin ; mica (exports and domestic sales); magnesium sulphate ; nepheline syenite (exports and domestic sales); phosphate ; peat fuel ; peat moss ; perlite ; quartz ; salt , 2 grades; silica brick ; soapstone ; sodium sulphate (exported and sold to Canadian firms); and talc ; all by quantity and by cost.	Estimated shipments	Annual	Q V	Annual Estimate of Canadian Mineral Production	Production of 18 items in <i>Preliminary Estimate of Canada's Mineral Production*</i> (26-202). These estimates are repeated in <i>Preliminary Report on Mineral Production*</i> (26-203) on a provincial basis	A shorter version of this form is used where appropriate.
Asbestos and feldspar , 2 types; garnet and iron oxides , 2 types; peat fuel and peat moss ; quartz , soapstone , and talc , all by tons; mica , export and domestic sales, by pounds.	Estimated shipments	Annual	Q V	Annual Estimate of Canadian Mineral Production	Production of 8 items in <i>Preliminary Estimate of Canada's Mineral Production*</i> (26-202)	
Asbestos (crude and milled fibres) 8 grades by tons. Gravel and stone .	Production Shipments (including own use) Inventories	Monthly	Q	Asbestos	Shipments, by 7 grades in <i>Asbestos</i> (26-001). Total production in <i>Production of Canada's Leading Minerals*</i> (26-007)	
Gypsum , anhydrite 2 grades and crude 3 grades, by tons.	Shipments or Used	Monthly	Q	Gypsum	Total production published in <i>Production of Canada's Leading Minerals*</i> (26-007)	
Salt , 5 types and salt content of brines used and shipped, by tons.	Production Shipments Inventories	Monthly	Q	Production and Shipments of Salt	<i>Salt</i> (26-214). Total production in <i>Production of Canada's Leading Minerals*</i> (26-007)	

Barite, feldspar, fluorspar, nepheline syenite, talc , by tons.	Production Shipments Destination of shipments Exports Inventories	Monthly	Q	Shipments of —	Not published monthly
Sodium sulphate , by tons.	Production Domestic shipments Exports Inventories	Monthly	Q	Production and Shipments of Sodium Sulphate	Not published monthly
Sand and gravel , sold or used, by yards or tons and selling value.	Production	Annual	Q V	Preliminary Survey of Mineral Production — Sand and Gravel	Production by quantity and value in <i>Preliminary Estimate of Canada's Mineral Production*</i> (26-202). Production by province, by tons and value in <i>Preliminary Report on Mineral Production*</i> (26-203)
Stone , sold or used, stone bought and resold by tons and value.	Production Purchases Sales	Annual	Q V	Preliminary Survey of Mineral Production — Stone	Production by quantity and value in <i>Preliminary Estimate of Canada's Mineral Production*</i> (26-202). By provinces in <i>Preliminary Report on Mineral Production*</i> (26-203)
Stone, sand and gravel used by provincial and local governments from their own pits and quarries, by tons and value.	Use	Annual	Q V	Stone and Sand and Gravel used on Highways, Stone, Sand and Gravel used by	Incorporated in published figures of production
Salt and calcium chloride used on highways, by tons.	Use	Annual	Q	Stone, Sand and Gravel used by	Form used for some provinces.
Cement , production, use at plant, shipments, stocks, estimated production for next 3 months.	Production Use Shipments Inventories Estimated future production	Monthly	Q	Production, Shipments and Stocks of Cement	<i>Cement</i> (44-001) (excluding expected production). Production in <i>Production of Canada's Leading Minerals*</i> (26-007)
Clay products , 11 items, all by value and 8 by quantity.	Shipments	Monthly	Q V	Output, Shipments and Stocks of Clay Products	Shipments of 7 groups, all by value and 3 by quantity in <i>Products Made from Canadian Clays*</i> (44-005)
Building brick, 3 kinds, by thousands; structural tile by tons; drain tile by thousands; vitrified flue lining 3 sizes and vitrified sewer pipe by feet.	Production Shipments Inventories	Monthly	Q	As above	Production and producers' sales in <i>Products Made From Canadian Clays*</i> (44-005) (Figures for all types of bricks consolidated, also for all types of flue lining)
Cement , by barrels, lime 2 types and silica sand by tons.	Production Use Shipments Inventories	Monthly	Q	Cement, Clay Products, Lime and Silica Sand	Production and shipments of cement in <i>Cement*</i> (44-001) Production of cement and lime in <i>Production of Canada's Leading Minerals*</i> (26-007)

Commodities	Concepts covered	Periodicity	Measured by quantity or value	Schedule used	Name of D.B.S. publication	Remarks
NON-METALLIC MINERALS—Concluded:						
Clay products , 10 groups, all by value and 6 by quantity	Shipments	Monthly	Q V	Cement, Clay Products, Lime and Silica Sand	Shipments of 7 groups, all by value and 3 by quantity, in <i>Products Made From Canadian Clays*</i> (44-005)	Minerals
Brick , 3 types, by thousands; structural tile by tons; drain tile by thousands; vitrified flue lining 3 sizes; and sewer pipe , by feet. Also, estimated production for next 3 months.	Production Shipments Inventories Estimated future production	Monthly	Q	As above	Production and producers' sales in <i>Products Made from Canadian Clays*</i> (44-005) (Figures for all types of bricks consolidated, also for all types of flue lining)	
Clay products of own manufacture by estimated value only.	Shipments	Annual	V	Preliminary Survey of Mineral Production—Clay Products	Shipments by value given in <i>Preliminary Estimate of Canada's Mineral Production*</i> (26-202). Value by province in <i>Preliminary Report on Mineral Production*</i> (26-203)	
Quicklime and hydrated lime sold or used, and limestone sold, by tons and value.	Sales Used	Annual	Q V	Preliminary Survey of Mineral Production—Lime	Lime produced, by quantity and value, in <i>Preliminary Estimate of Canada's Mineral Production*</i> (26-202). Provincial breakdown of total, also national figures for quantity and value of quicklime and hydrated lime, in <i>Preliminary Report on Mineral Production*</i> (26-203)	
Lime , quick and hydrated, produced, used in own works, shipped and stocks.	Production Use Shipments Inventories	Monthly	Q	Production and Shipments of Lime	Total production in <i>Production of Canada's Leading Minerals*</i> (26-007)	
Sand-lime brick , 2 grades, by thousands; production, shipments, stocks, estimated production next three months.	Production Shipments Inventories Estimated future production	Monthly	Q	Monthly Report on Sand-Lime Brick	Production, shipments and stocks in <i>Products Made From Canadian Clays*</i> (44-005)	
Asbestos , 2 types; gypsum ; peat moss ; sodium sulphate ; barite ; fluorspar , quartz , silica sand , quartzite , coal ; held by mines, by tons and by value.	Inventories	Quarterly	Q V	Quarterly Inventories, Petroleum and Non-Metal Mining		Inventories

FOODS AND BEVERAGES:

Foods and Beverages

Animal oils and fats , 10 kinds, by pounds	Production Inventories	Monthly	Q	Animal Oils and Fats Production and Inventory	<i>Oils and Fats*</i> (32-006)	The Agriculture Division publishes data on production and stocks of butter in Dairy Factory Production (32-002) and Stocks of Dairy and Poultry Products (32-009)
Margarine , shortening, coconut oils and salad and cooking oils, by pounds	Production Inventories	Monthly	Q	Production	Figures for margarine in <i>Margarine Statistics</i> (32-005)	
Vegetable oils , 8 kinds; fish oils, 5 kinds and animal oils, 5 kinds used in margarine and other spreads, shortening and oils, by pounds	Consumption Inventories	Monthly	Q	Production	Consumption of oils and fats in margarine and shortening in <i>Oils and Fats*</i> (32-006)	
Process cheese made from cheddar and from other cheese by pounds	Production Inventories	Monthly	Q	Production and Stocks of Process Cheese	Data for process cheese from cheddar cheese only in D.B.S. Daily Bulletin	
Dry skim milk powder , packed for retail sale, by pounds	Production	Quarterly	Q	Dry Skim Milk Powder	<i>Quarterly Report on Processed Foods*</i> (32-007)	
Storage holdings, and freezings during month of sea fish (frozen fresh) by type of fish and type of processing; frozen fish held for bait and animal feed; inland fish (frozen fresh) by type of fish and by type of processing; sea and inland fish (frozen smoked) by species and by type of processing; all by pounds	Production Inventories	Monthly	Q	Monthly Frozen Fish Report	Data for Maritime Provinces and individually for other provinces in <i>Fish Freezings and Stocks (Cold Storage Holdings of Fish)</i> (24-001). Canada total for stocks in <i>Monthly Review of Canadian Fisheries Statistics*</i> (24-002)	Fisheries
Fresh or frozen fish or shellfish , by species and type of process; purchased, produced, sales and stocks, by quantity.	Production Purchases Sales Inventories	Monthly	Q	Monthly Report (Fish Processors, Packers and Handlers) Section A	Production in <i>Monthly Review of Canadian Fisheries Statistics*</i> (24-002)	Fisheries
Fish , salted and pickled, by species and type of process; purchased, produced, sold, stocks, by quantity.	Production Purchases Sales Inventories	Monthly	Q	Monthly Report (Fish Processors, Packers and Handlers) Section B	Production and stocks in <i>Monthly Review of Canadian Fisheries Statistics*</i> (24-002)	Fisheries
Canned fish , by species and type of product, purchased, produced, sold, stocks, by quantity	Production Purchases Sales Inventories	Monthly	Q	Monthly Report (Fish Processors, Packers and Handlers) Section C	Production of main items in <i>Monthly Review of Canadian Fisheries Statistics*</i> (24-002)	Fisheries

TOBACCO AND TOBACCO PRODUCTS—Concluded:						
Cigars and cigarettes manufactured by thousands, tobacco , 2 types and snuff, by pounds	Production	Quarterly	Q	Unmanufactured Tobacco—Stocks on Hand	Not published	Foods and Beverages Published figures are for tax-paid withdrawals, as stated by Dept. of National Revenue.
Tobacco , 16 types, purchased by processors, by area, by pounds and by value.	Purchases	Annual	Q V	Record of Leaf Tobacco Purchases	<i>Leaf Tobacco Production and Value</i> (22-205)	Form is sent out once a year, based on crop year.
Tobacco , manufactured and unmanufactured, sales domestic and export, by dollars.	Domestic sales Exports	Monthly	V	Monthly Inventory Survey	Not published separately	Inventories
RUBBER PRODUCTS:						
Rubber , natural, 2 kinds, synthetic, 6 kinds and reclaimed, 2 kinds, all by pounds.	Inventories Receipts Production Sales Consumption	Monthly	Q	Consumption and Production of Rubber, by Types, during the month of	Consumption, production and inventories of rubber by tons, also sales by consumers in <i>Consumption, Production and Inventories of Rubber</i> (33-003)	Textiles and Miscellaneous Products
LEATHER PRODUCTS:						
Boots and shoes with leather or fabric uppers (except felt) 9 classes; slippers 4 classes; moccasins ; felt footwear, 2 classes and Indian slippers, all by type and by number of pairs	Production	Monthly	Q	Monthly Report of Leather Footwear Production	<i>Production of Leather Footwear</i> (33-002)	Textiles and Miscellaneous Products
Hides and skins , by type of animal and by source; stocks unsold and sold but held for future delivery, stocks in transit, purchases and take-off, all by quantity.	Purchases and take-off Inventories	Monthly	Q	Report on Raw Hides and Skins	Total stocks of raw hides and skins in <i>Statistics of Hides, Skins and Leather*</i> (33-001)	Report goes to big packers. A shorter version, goes to small packers and dealers.
Hides and skins shipped for export, and undelivered export commitments.	Exports	Monthly	Q	Report on Raw Hides and Skins	Not published	
Raw hides , cattle; domestic 2 kinds and foreign from U.S. or other countries, by number.	Receipts Wettings Hides in transit Hides in process Inventories	Monthly	Q	Confidential Monthly Report of Sole Leather Tanners	Total wettings and stocks of raw hides and skins given in <i>Statistics of Hides, Skins and Leather*</i> (33-001) for all tanners combined.	

Finished leathers , specified, and other leather to be specified by respondent.	Production Domestic deliveries Exports Inventories	Monthly	Q	As above	Production and deliveries in <i>Statistics of Hides, Skins and Leather</i> * (33-001) also stocks of most items
Hides and skins , by type of animal and by source; receipts, wettings, stocks, in transit, in process; all by quantity	Stocks Receipts Wettings in Hides in transit Hides in process Inventories	Monthly	Q	Confidential Monthly Report of Tanners, Other than Sole Leather	Total wettings and stocks of raw hides and skins given in <i>Statistics of Hides, Skins and Leather</i> * (33-001) for all tanners combined
Finished leathers , 10 types specified, and other types to be specified by respondent.	Production Deliveries Exports Inventories	Monthly	Q	As above	<i>Statistics of Hides, Skins and Leather</i> * (33-001)
TEXTILES: Pelts , Canadian and imported, by number and pounds of wool produced	Production	Annual	Q	Pulled Wool Production	Textiles and Miscellaneous Products Only 4 firms submit returns. Data are used by Agriculture Division.
CLOTHING: Garments , 59 types, each sub-divided by men's - and - youths', and boys', by number.	Production	Quarterly	Q	Quarterly Production of Men's, Youths' and Boys' Garments	Textiles and Miscellaneous Products Fifty types of men's and youths' garments and 41 types of boys' garments in <i>Quarterly Production of Garments</i> * (34-001)
Garments , 50 types, each subdivided by women's - and - misses', and by children's (under 14); by number.	Production	Quarterly	Q	Quarterly Production of Women's, Misses' and Children's Garments	Forty-six types of women's and misses' garments, and 42 types of children's garments in <i>Quarterly Production of Garments</i> * (34-001)
Foundation garments , 6 types, shipments, by dozens.	Shipments	Monthly	Q	Monthly Shipments of Foundation Garments	Published in the Daily Bulletin
ENEERS AND PLYWOODS: Peeler logs , domestic softwood 3 kinds, hardwood 7 kinds and imported hardwood 4 kinds, by thousands of board feet.	Deliveries Consumption Inventories Produced or contracted for, not delivered	Monthly	Q	Peeler Logs, Veneers and Plywoods	Forestry <i>Peeler Logs, Veneers and Plywoods</i> (35-001)
Veneers , 2 thicknesses in 4 native softwoods, 11 native hardwoods, 7 imported woods; plywoods , 1/4 inch basis, in 4 native softwoods, 11 native hardwoods and 7 imported woods; all by thousand square feet.	Production Domestic shipments Exports Inventories	Monthly	Q	As above	As above

Commodities	Concepts covered	Periodicity	Measured by quantity or value	Schedule used	Name of D.B.S. publication	Remarks
SAWMILL PRODUCTS:						
Lumber sawn, softwood 6 kinds, and hardwood 4 kinds; lumber purchases, domestic and foreign, and distribution of shipments in Canada and abroad, lumber on hand, 10 kinds of wood, all by thousands of board feet.	Production Purchases Shipments Inventories	Monthly	Q	Production, Shipments and Stocks on Hand Sawmills East of the Rockies	<i>Production, Shipments and Stocks on Hand of Sawmills East of the Rockies</i> (35-002)	Forestry
Lumber , 9 types softwood and 5 types hardwood; quantity sawn and inventories; number and quantity of sawn ties included in the above. Shipments of lumber by means of transportation, by province of destination, and by export destination. All by thousands of board feet. Distribution of orders on hand by thousands of feet and by destination.	Production Shipments Inventories	Monthly	Q	Production, Shipments and Stock on Hand British Columbia Sawmills	<i>Production, Shipments and Stocks on Hand of Sawmills in British Columbia</i> (35-003)	
Laths , 6 classes of softwoods in 3 sizes, hardwoods in 2 sizes; production and stocks by quantity.	Production Stocks	Monthly	Q	Lath	Not published. Interested departments obtain data	
Shingles , cedar and all other species by squares.	Production Stocks	Monthly	Q	Shingles	Not published. Type-written statement sent to interested trade associations	
Shingles , red cedar, production of 3 sizes, 4 grades in each size. Distribution of shipments by means of transportation and by 8 regions in Canada, 2 overseas and the U.S.	Production Purchases Shipments Inventories	Monthly	Q	Monthly Report of Production, Shipments and Stock on Hand of Red Cedar Shingles	Not published. Type-written statement sent to interested trade associations	
Sawn ties by 5 types of wood; production and stocks, by number.	Production Inventories	Monthly	Q	Sawn Ties	Not published. Interested departments obtain data	Forms used east of Rockies only.
PAPER PRODUCTS:						
Rigid insulating board , 5 types production, domestic and export shipments, by square feet on 1/2 inch basis.	Production Domestic shipments Exports	Monthly	Q	Rigid Insulating Board (Wood Fibre)	Production and domestic shipments in <i>Rigid Insulating Board Industry</i> (36-002)	Wood and Paper Products
Hard board , 3 types, production, domestic and export shipments, by square feet on 1/8 inch basis	Production Domestic shipments Exports	Monthly	Q	Hard Board (Wood Fibre)	<i>Hard Board</i> (36-001)	
Asphalt roofing 8 types; production, shipments to 6 areas, and exports by grades and by quantity. Roofing pitch and roofing asphalt shipped to 6 areas by tons.	Production Domestic shipments Exports	Monthly	Q	Production and Shipments of Asphalt Roofing and Domestic Shipments of Roofing Pitch and Roofing Asphalt	<i>Asphalt Roofing</i> (45-001)	

Asphalt tile, 2 thicknesses, and **vinyl-asbestos tile**, 4 thicknesses; production, domestic shipments and exports, by square feet.

IRON AND STEEL PRODUCTS:

Cast iron sectional **heating boilers**, 3 sizes, by number; steel heating boilers, 5 sizes, by number; radiators for heating, 5 types, by sq. ft.

Builders' and shelf **hardware**, by value.

Domestic **range boilers**, 3 types, by number.

Domestic water-tank **heaters**, electric, 5 types, and gas-fired, 2 types, by number

Stoves and furnaces, 38 items, production by number, shipments by number. Shipments by value for main groups.

Condensing units, 13 types, **compressors and compressor units**, 5 types; **centrifugal refrigeration**; **evaporative condensers**, 2 types; **cooling towers**, 2 types; **air conditioning units**, 5 types; **room air conditioners**, 5 types; **unit coolers**—**refrigeration**, 4 types; **miscellaneous**, 4 types; **residential air conditioners**; **ice-making machines**; all other **refrigeration and air conditioning products** and commercial refrigeration, 25 items, all by number and factory selling value for each group.

Air Conditioning and Refrigeration Equipment, 34 types, factory shipments of own manufacture only and value of all shipments

Fans, 5 kinds, **unit heaters**, 3 kinds, and **ventilators**, 4 kinds; all by number and value of shipments.

Water **pumps**, 9 types, production by number, shipments by number and value.

Blanks and tools, cemented tungsten carbide, producers' shipments, by value.

GUIDE TO THE COMMODITY STATISTICS OF THE INDUSTRY AND MERCHANDISING DIVISION

(OTHER THAN CENSUS OF INDUSTRY)

A WORKING MANUAL

DOMINION BUREAU OF STATISTICS

Industry and Merchandising Division

OTTAWA, CANADA

July, 1957

FOREWORD

This Working Manual is a new departure for the Dominion Bureau of Statistics, and as such is to some extent experimental.

We have always been conscious of the need for providing all potential users of our statistics with the fullest information about what is available. In this manual, we take another step forward by presenting an analytical listing of the statistical series compiled in a given field.

This study of those statistics of the Industry and Merchandising Division which deal with commodities was prepared by Mr. R.J. Loosmore, the Assistant to the Director of that Division.

WALTER E. DUFFETT

Dominion Statistician

11 June, 1957.

GUIDE TO THE COMMODITY STATISTICS OF THE INDUSTRY AND MERCHANDISING DIVISION

(OTHER THAN CENSUS OF INDUSTRY)

The framework of the activities of the Industry and Merchandising Division consists of regular annual surveys. The main one is the Census of Industry which covers manufacturing, mining, forestry and the fisheries. Ancillary to this is the survey of manufacturing shipments and inventories. Another major group of annual and biennial surveys covers wholesale and retail trade, together with a number of service trades.

A great deal of information about individual commodities is provided by the Census of Industry. For most industries, considerable detail is given both on the products made, and on the materials used. Information on a commodity basis is also being increasingly sought in the Division's other annual surveys.

Commodity data collected from manufacturers in the course of the Census of Industry are collated in the Central Assembly Unit, which maintains detailed card index systems for products made and materials used. Data on shipments of individual commodities are given in *General Review of the Manufacturing Industries of Canada*, and in *Preliminary Statement of manufactures*.

The range of data collected by the Industry and Merchandising Division outside its annual census work is considerable. Most of the surveys concerned are monthly ones which provide data for a number of purposes. In some cases, a government department may need the figures. In most cases, the results of surveys are published, and this increases general knowledge of the working of the economy. The monthly coal statistics, for example, are used by the Dominion Coal Board for administrative purposes, but they are also of general interest.

Some series are collected primarily for the economist. The monthly telegraphic reports on the production of steel and automobiles, for instance, provide valuable indicators of current economic activity.

Some information is collected by special annual surveys in order to provide an early estimate of production, in advance of the regular Census of Industry reports. The annual production of certain minerals, for instance, is asked for on a special early schedule so that the *Preliminary Estimate of Canada's Mineral Production* can be published a day or so after the end of the year in

question. Data for some other minerals covered by this publication are obtained from the monthly reports. In other cases, a special survey may be used to obtain an early figure for the annual production of a commodity, such as sulphuric acid or vacuum cleaners. Special surveys may also be used for specific purposes, such as the sales of pest control products (annual) or the use of chemicals by municipal waterworks (biennial). Other data are collected at varying intervals.

Although most of the data are published, there is a good deal of unpublished information, all of which is used by one or more groups of persons. In some cases, the data from an individual survey are combined with other material in the Bureau to form part of a consolidated result. In all other cases, at least one government department is likely to be interested. In many cases, the tabulated results of the survey are made available to the respondents.

Always subject to the over-riding need to protect the interests of individual firms, it would appear that many users of statistics could obtain more information than they do at present, if they knew where to look for it. It is hoped that, by study of this memorandum, they may learn some new places in which to look.

This manual provides a systematic guide to those commodity statistics of the Division which do not form part of the regular annual Census of Industry. Commodity statistics are regarded here as those which apply to a specified commodity or group of commodities, and are collected as such. Statistics of an industry, which is itself defined in terms of commodities, are not regarded as commodity statistics.

The manual is laid out on the lines of the volumes, parts and sections of the annual Census of Industry reports for 1955. Commodity data from other surveys are arranged under the reference number of the publication for the industry which produces the product and consumes these materials. A strict arrangement by commodities would not be practicable, because one schedule may deal with a wide variety of them, including both materials used and products made.

This system, based on the sections of Census of Industry reports, is also used in a related statistical guide, *Guide to Publications of the Industry and Merchandising Division which Delimit Sub-*

*Groups of the Standard Industrial Classification*¹. The reader can use that guide to find out which Census of Industry publications cover a specified industry. Sources of statistics on the major commodities of that industry can then be found by cross-reference to this volume.

The presentation of information in this manual is based on the schedule used for collecting the commodity data, or an alternative medium such as regular telegrams or letters. For each schedule, a summary of the data collected is given in the left-hand column. The next column lists the concepts covered. A reader interested mainly in production, for instance, could scan this column and check any line dealing with that concept. The third column shows the periodicity. Here the reader could scan for monthlies only, for example. The fourth column indicates whether the data are available in terms of quantity, value or both.

The fifth column gives the name of the form, together with a reference number which is likely to be of interest only within D.B.S. Users of statistics might find it useful to obtain blank copies of forms used within their fields of interest, as this gives a good idea of what data are likely to exist and of the instructions which were given to respondents. Of course, not all the information which is collected can be made available, because the

1. This guide will be issued as a companion to the present manual.

interests of individual firms must be protected¹. The sixth column shows where the published data are to be found. The reference numbers given here are those used in *Current Publications*, a pamphlet which lists D.B.S. publications and gives useful information for purchasers. In cases where a publication is referred to more than once in this memorandum, an asterisk appears after its name. The seventh column gives any necessary comments.

At the top of each page is the name of the section of the Industry and Merchandising Division which handles the data shown on that page. In some cases, a form described lower down on the page is handled by a different section, which is named opposite the schedule.

1. The Statistics Act, Sub-Sections 15 (1) and 15 (2), states: —

"15. (1) No individual return and no part of an individual return made, and no answer to any question put, for the purposes of this Act, shall, without the previous consent in writing of the person or of the owner for the time being of the undertaking in relation to which the return or answer was made or given, be published, nor, except for the purposes of a prosecution under this Act, shall any person, other than a person employed by the Bureau or working under arrangement with the Bureau and sworn under section 6, be permitted to see any such individual return, part or answer".

"15. (2) No report, summary of statistics or other publication under this Act shall contain any of the particulars comprised in any individual return so arranged as to enable any person to identify any particulars so published as being particulars relating to any individual person or business."

VOL. I PT. I, SECTION A TO F

METAL MINING, SMELTING AND REFINING

Ore hoisted, ore milled and waste material sorted and discarded, by short tons.

Gold and **silver** bullion, by fine ounces.

Ore, nine types, by tons; metallic content in ounces (gold & silver) or pounds (copper, lead, zinc, nickel cobalt, sulphur).

Ores and concentrates, ten types, metallic content in ounces (gold, silver) or pounds (copper, lead, zinc, arsenic, tungsten, sulphur).

Gold and **silver** bullion, by fine ounces.

Ores and concentrates, ten types, by tons; metallic content in ounces or pounds.

Ore hoisted and treated by copper mines. Metal content of anodes made. **Pyrite** shipped, by quantity and by sulphur content.

Iron ore mined, shipped to Canada and abroad, beneficiated; **beneficiated ore** shipped to Canada and abroad, stocks at month-end; all by quantity.

Pyrite concentrates received and treated by quantity and by sulphur content; **sulphur** and sulphur dioxide shipped; **iron ore** or residue on hand, produced, shipped to Canada and abroad; all by quantity.

Molybdenum ore mined and treated, by tons; **molybdenite concentrates** produced, shipped, and stocked by pounds and by molybdenum content; **bismuth concentrate** produced and shipped.

Shipments	Monthly	Q	Monthly Report on Alloy Steel (6512-217.2)	Production and shipments by 6 product groups, and total shipments to 17 groups of consumers in <i>Primary Iron and Steel*</i> (259)	
Grinding balls , 3 types produced by tons, shipped by tons and value.	Production Shipments	Annual	Q QV	Collected by letter	<i>Grinding Balls</i>	
Steel pipes and tubing , by 4 processes, by 5 classes; steel pipe fittings, 2 types, production and shipments, by tons.	Production Shipments	Monthly	Q	Monthly Report on Steel Pipes, Tubes and Fittings (6512-28)	<i>Iron Castings and Cast Iron Pipes and Fittings*</i> (254)	
Steel wire , 5 types; wire fencing, 3 types; wire rope and wire strand, 4 types; nails, tacks and staples, 4 types; by tons.	Production Shipments	Monthly	Q	Monthly Report on Steel Wire and Wire Products (6512-144)	<i>Steel Wire and Specified Wire Products</i> (264) (wire rope by 3 types)	
Wire rod used in manufacture of steel wire, by tons.	Use	Monthly	Q	As above	Not published	
Sanitaryware , 12 items, by numbers.	Production Shipments Stocks	Monthly	Q	Monthly Report on Sanitaryware (6512-122)	Data for 9 items in <i>Sanitaryware</i>	
Ferrosilicon produced as by-product, shipped in Canada and elsewhere, stocks.	Production Shipments Stocks	Quarterly	Q	Report by Producers of By-product Ferrosilicon and Consumers of Bauxite (6502-206)		Mineral Statistics Section. Most of the firms concerned are in the artificial abrasives industry. See also Vol. I Pt. I Sections A to F for bauxite used.
Farm implements and equipment , by type, wholesale sales by number and value.	Sales	Annual	Q V	Farm Implements and Equipment (6505-58)	<i>Farm Implement and Equipment Sales</i> (380)	Merchandising and Services Section

VOL. II PT. XIII

TRANSPORTATION EQUIPMENT

Motor vehicles — production of passenger cars and commercial vehicles.	Production	Monthly	Q	By telegraph	<i>Preliminary Report on the Production of Motor Vehicles</i> (345a)	Metal and Chemical Products Section
Passenger cars , 9 types, trucks 8 types, and coaches or buses ; production, shipments by civilian and military types to Canada and export, and imports; all by units.	Production Domestic shipments Exports Imports	Monthly	Q	Monthly Report on Motor Vehicles (6512-135)	<i>Motor Vehicle Shipments</i> (346) Military shipments not stated separately	
Passenger cars, trucks, buses ; sales by provinces by number and by dollars.	Sales	Monthly	Q V	New Motor Vehicle Sales (6505-53)	<i>New Motor Vehicle Sales and Motor Vehicle Financing</i> (385)	Merchandising and Services Section
Passenger cars, trucks, buses ; number financed and value of financing.	Financing	Monthly	Q V	Financing of Motor Vehicle Sales (6502-52)	<i>New Motor Vehicle Sales and Motor Vehicle Financing</i> (385)	Merchandising and Services Section
Motor vehicles , new and used, retail sales by value, retailers' stocks by number and value.	Sales Inventories	Monthly	V Q V	Motor Vehicle Dealers (6505-156)		Merchandising and Services Section
Oil filters — production, imports and exports of 3 types, by number.	Production Imports Exports	Monthly	Q	Monthly Report on Oil Filters and Cartridges (6512-87)	<i>Oil Filters and Cartridges</i>	

VOL. II PT. XIV

NON-FERROUS METAL PRODUCTS

Aluminum , unfabricated 3 types and semi-fabricated 13 types, secondary aluminum and scrap aluminum, by pounds of aluminum content.	Production Receipts Consumption Shipments Inventories	Quarterly	Q	Quarterly Report by Consumers and Distributors of Aluminum and Aluminum Alloys (6502-200)	Annual consumption of aluminum ingots published in <i>The Miscellaneous Metal Mining Industry*</i> (412)	Current information is used by government departments.
Antimony regulus; antimony , primary 3 types, secondary and scrap, by pounds of antimony content.	Receipts Consumption Shipments Inventories	Quarterly	Q	Report by Consumers and Distributors of Antimony (6502-201)	Annual consumption of antimony metal, by industries, published in <i>The Miscellaneous Metal Mining Industry*</i> (412)	
Antimony , primary, secondary and scrap, used for 8 purposes by pounds of antimony content.	Use	Quarterly	Q	As above		
Cadmium , receipts, used for 6 purposes, shipments, stocks, by pounds.	Receipts Consumption Shipments Inventories	Quarterly	Q	Report by Consumers and Distributors of Cadmium (6502-202)	Annual consumption given in <i>The Miscellaneous Metal Mining Industry*</i> (412)	
Primary copper; semi-fabricated copper 13 types; nickel silver and other nickel base alloys; secondary copper , 3 types; production, receipts, consumption, shipments to Canada and export, stocks; all in pounds.	Production Receipts Consumption Domestic shipments Exports Inventories	Quarterly	Q	Producers of Wrought Copper and Wrought Copper Base Alloys (6502-252)		Current information is used by government departments.

VOL. II PT. XIV — concluded

NON-FERROUS METAL PRODUCTS — concluded

Copper wire bar, receipts, rolled and stocks; **copper wire rod**, production, shipments to Canada and export, stocks; by pounds.

Monthly Report by Rollers of Copper Wire Rod (6502-199)

Q

Copper wire rod and scrap receipts, consumption, shipments and stocks.

Report by Drawers of Copper Wire (6502-205)

Q

Copper, primary, semi-fabricated (including copper base alloys) 14 types, secondary 3 types, by pounds.

Report by Consumers and Distributors of Unwrought Copper and Wrought Copper and Wrought Copper Base Alloys (6502-244)

Q

Annual consumption of copper published in *The Nickel-Copper Mining, Smelting and Refining Industry** (418)

Refined lead, primary, secondary, scrap; receipts, consumption, shipments, stocks, by pounds.

Report by Consumers of Refined Lead (6502-207)

Q

Annual consumption of lead for 8 principal end-uses is published in *The Silver — Lead — Zinc Mining Industry** (424)

Manganese ore, 3 grades, **chrome ore**, grade specified by respondent; receipts, consumption, shipments, stocks, by long tons of 2,240 pounds.

Report by Consumers of Metallurgical Grade Manganese Ore and Chrome Ore (6502-209)

Q

Current information is used by government departments

Manganese alloys, 5 types, **chromium alloys**, 2 types, **calcium alloys**, 2 types, other ferro alloys specified by respondent; production, shipments to Canada and abroad, stocks, by long tons of 2,240 pounds.

Report by Consumers of Metallurgical Grade Manganese Ore and Chrome Ore (6502-209)

Q

Manganese ore, battery grade, receipts, consumption, shipments, stocks, by long tons of 2,240 pounds.

Report by Consumers of Battery Grade Manganese Ore (6502-208)

Q

Metallic mercury, receipts, sales, consumption, stocks, by pounds.

Report by Consumers of Metallic Mercury (6502-210)

Q

Annual consumption of mercury by 5 principal uses is published in *The Miscellaneous Metal Mining Industry** (412)

Molybdenum in primary forms, 7 types; receipts, consumption, shipments, stocks, by pounds of molybdenum content.	Receipts Use Shipments Inventories	Quarterly	Q	Quarterly Report by Consumers of Molybdenum in Primary Forms (6502-211)	Current information is used by government departments
Nickel in primary forms, 6 types; receipts, consumption, shipments, stocks, by pounds of nickel content.	Receipts Use Shipments Inventories	Quarterly	Q	Report by Consumers of Nickel in Primary Forms (6502-222)	
Aluminum scrap , 6 types, copper scrap , 8 types, tin-lead scrap , 7 types, nickel scrap , 5 types, zinc scrap , 8 types, by pounds.	Receipts Domestic shipments Exports Inventories	Quarterly	Q	Report by Dealers of Non-Ferrous Scrap Metal (6502-217). Also, less domestic shipments, on Report by Consumers of Non-Ferrous Scrap Metal (Purchased Scrap only) (6502-220)	
Platinum and palladium receipts, consumption, domestic sales, exports, loss, stocks, by troy ounces.	Receipts Use Domestic sales Exports Losses Inventories	Quarterly	Q	Report by Consumers of Unmanufactured Platinum and Palladium (6502-212)	
Fine silver bars, receipts, consumption, shipments, stocks, by troy ounces.	Receipts Imports Shipments Consumption Inventories	Quarterly	Q	Quarterly Report by Consumers of Fine Silver (6502-213)	Estimated annual consumption for five purposes in <i>The Silver—Lead-Zinc Mining Industry*</i> (424)
Tin, primary , receipts, consumption, shipments, stocks by pounds.	Receipts Use Shipments Inventories	Quarterly	Q	Quarterly Report by Consumers and Distributors of Unmanufactured Tin (6502-214)	
Tungsten in primary forms, 7 types, receipts, consumption, shipments, stocks, by pounds of tungsten content.	Receipts Use Shipments Inventories	Quarterly	Q	Quarterly Report by Consumers of Tungsten in Primary Forms (6502-215)	
Zinc , refined, secondary and scrap; production, receipts, consumption, shipments, stocks, by pounds.	Production Receipts Use Shipments Inventories	Quarterly	Q	Quarterly Report by Consumers of Refined Zinc (6502-216)	

VOL. II PT. XV

ELECTRICAL APPARATUS AND SUPPLIES

Storage batteries for 7 uses, by number and value, also parts and supplies.

Sales

Monthly

Q V

Monthly Report on Factory Sales of Electric Storage Batteries (6512-124)

Sales for 4 uses by number and value; sales for all other purposes, and parts and supplies, by value only; in *Factory Sales of Electric Storage Batteries* (210)

Metal and Chemical Products Section

Commodities	Concepts covered.	Periodicity	Measured by quantity or value	Schedule used	Name of D.B.S. publication	Remarks
VOL. II PT. XV — concluded						
ELECTRICAL APPARATUS AND SUPPLIES — concluded						
Television receivers, radio receivers 4 types, record players 2 types; production, sales to 9 areas, by number. Canada sales by value.	Production Sales	Monthly	Q V	Radio and Television Receiving Sets (including Record Players) (6512-169)	Sales to 9 areas by number, Canada sales by value published in <i>Radio and Television Receiving Sets (Including Record Players)*</i> (212)	Metal and Chemical Products Section
Vacuum tubes, 4 classes, production by number of units, and shipments by number and value.	Production Shipments	Monthly	Q V	Monthly Report on Vacuum Tubes (6512-136)	Data for radio and television receiving tubes in <i>Radio and Television Receiving Sets (Including Record Players)*</i> (212)	
Refrigeration equipment, 30 types, factory shipments by number and value.	Shipments	Annual	Q V	Special Report on Factory Shipments of Refrigeration Equipment (6512-163)	Used for a preliminary statement. <i>Refrigeration Equipment</i> (213)	
Refrigerators, and freezers, domestic type, production, shipments to 8 areas, exports, stocks, by number.	Production Shipments Exports Inventories	Monthly	Q	Monthly Report on Domestic Type Mechanical Refrigerators and Freezers (6512-125)	<i>Domestic Electric Refrigerators</i> (214)	
Electric vacuum cleaners, 3 types, production by number, shipments by number and value; shipments of attachments and parts, by value.	Production Shipments	Annual	Q V	Production and Factory Shipments of Domestic Electric Vacuum Cleaners (6512-160)	<i>Electric Vacuum Cleaners (Preliminary Statement)</i>	
Domestic washing machines, electric 3 types, gasoline and hand; production by number, sales by number and value.	Production Sales	Annual	Q V	Production and Factory Shipments of Domestic Washing Machines (6512-161)	<i>Preliminary Statement on Domestic Washing Machines</i> (Excludes apartment type machines)	
Washing machines, electric 2 types and gasoline, clothes dryers, 2 types; production, shipments by 8 areas, exports and stocks by number.	Production Shipments Exports Inventories	Monthly	Q	Monthly Report on Washing Machines (6512-126)	<i>Domestic Washing Machines</i> (216) (Electric and gas dryers combined)	
Electrical appliances, 37 types; shipments by number and value.	Shipments	Annual	Q V	Factory Shipments of Specified Electrical Appliances (6512-162)	<i>Factory Sales of Specified Electrical Appliances</i>	
Lamps, 7 classes; production, imports, sales and inventories, by number; sales by 6 regions, by value.	Production Imports Sales Inventories	Monthly	Q Q V Q	Monthly Report on Canadian Lamp Industry (6512-123)	<i>Electric Lamps</i>	

VOL. II PT. XVI

NON-METALLIC MINERAL PRODUCTS

Gypsum products, 5 items; production, domestic shipments, exports, stocks; by quantity.

Mineral wool, 5 types; production, shipments by 2 areas, exports.

Production, shipments and stocks of **concrete brick**, **concrete blocks** 3 kinds, concrete chimney blocks, all by number; concrete **drain pipe**, sewer pipe, water pipe and **culvert tile** by tons; and **concrete** ready-mixed by cubic yards.

VOL. II PT. XVII SECTION B

COAL PRODUCTS

Coal, Canadian, U.S., and other countries received by coke and gas plants, by cost per ton and by tons; charged to coke ovens, retorts and water gas sets by tons; used for other purposes by coke and gas plants, by tons; sales and stocks by tons.

Coke, 2 types, produced; **coke**, imported and Canadian, 2 types, purchased by coke and gas plants; coke, 2 types, used for 3 purposes; sold through 5 channels; stocks; by tons.

Coke, 2 types, cash selling price to domestic consumers, in one-ton lots.

Manufactured gas, sales to four classes of consumers by thousands of cubic feet and by value; sales in seven regions to three types of consumer by thousands of cubic feet.

VOL. II PT. XVII, SECTION C

PETROLEUM PRODUCTS

Petroleum fuels, 3 classes delivered for heating purposes by barrels of 35 imperial gallons, by provinces and principal cities.

Metal and Chemical
Products Section

Production Domestic shipments Stocks	Monthly	Q	Monthly Report on Gypsum Products (6512-149)	<i>Gypsum Products</i> (302)
Production Domestic shipments Exports	Monthly	Q	Monthly Report on Mineral Wool (6512-148)	All figures except exports in <i>Mineral Wool</i> (305)
Production Shipments Stocks	Monthly	Q	Monthly Report on Concrete Products (6512-150)	Production and shipments in <i>Concrete Products</i> * (296)

Mineral Statistics Section

Receipts Use Sales Stocks	Monthly	Q Q Q Q	Monthly Coke Report (6502-182)	Quantity used for coke making, Canadian and imported, published in <i>Coal and Coke Statistics</i> * (202)
Production Purchase Use Sales Stocks	Monthly	Q	As above	Production of coke, use for 2 purposes, sales through 4 channels, published in <i>Coal and Coke Statistics</i> * (202)
Price	Monthly	V	Monthly Coke Report (6502-182)	
Sales Number of customers	Monthly	Q Q	Monthly Report on Manufactured Gas (6512-141)	Sales of manufactured gas to 4 classes of consumers in Eastern Canada and Western Canada in <i>Crude Petroleum, Natural Gas and Manufactured Gas</i> * (405)

Metal and Chemical Products Section carries out the Census of Industry in this field.

Collected and compiled by Metal and Chemical Products Section, Published by Mineral Statistics Section.

Metal and Chemical Products Section

This form goes to refineries.
Deliveries for heating in principal cities published in *Consumption of Petroleum Fuels** (206)

Q Petroleum Fuels Survey (6512-83)

Annual

Sales, retail

Commodities	Concepts covered	Periodicity	Measured by quantity or value	Schedule used	Name of D.B.S. publication	Remarks
VOL. II PT. XVII, SECTION C - concluded						
PETROLEUM PRODUCTS - concluded						
Petroleum fuels , 4 classes by 7 areas; deliveries to 10 classes of user, by barrels.	Deliveries Exports	Annual	Q	Petroleum Fuels Survey (6512-83)	Deliveries for consumption in <i>The Petroleum Products Industry*</i> (207) and in <i>Consumption of Petroleum Fuels*</i> (206)	Metal and Chemical Products Section
Petroleum fuels , 4 classes handled by dealers, use or deliveries for 7 types of use, sources of supply, resales to other dealers, all by barrels of 35 Imperial gallons.	Use Deliveries Purchases Resales	Annual	Q	Petroleum Fuels Survey (6512-82)	Deliveries for consumption in <i>The Petroleum Products Industry*</i> (207) and <i>Consumption of Petroleum Fuels*</i> (206)	This form goes to dealers. There are separate schedules for the Atlantic Provinces, Quebec, Ontario, Prairie Provinces, and British Columbia. Data for heating, lighting and cooking are taken for principal cities in each area.
Petroleum coke , production, purchases, imports, deliveries for 2 purposes, losses, exports, inventories, by tons.	Production Purchases Imports Deliveries Exports Losses Inventories	Annual	Q	Petroleum Fuels Survey (6512-77)	Deliveries for heating in <i>The Petroleum Products Industry*</i> (207) Deliveries for heating and as raw material in <i>Consumption of Petroleum Fuels*</i> (206)	
Fuel and diesel oil used by railways for six purposes in five areas by imperial gallons; also amount of diesel oil in total. Total inventory at year end. Kerosene used for 2 purposes in five areas and inventory at year-end, by imperial gallons.	Consumption Inventories	Annual	Q	Consumption of Fuel and Diesel Oil, and of Kerosene by the (6512-76)	Consumption for 7 purposes in <i>Consumption of Petroleum Fuels*</i> (206)	Forms sent to C.N.R. and C.P.R. only.
Fuel and diesel oil used by railroads as fuel for 7 purposes, by imperial gallons; amount of diesel oil in total. Total inventory at year-end. Kerosene and long-time burning oils used for 2 purposes, by imperial gallons.	Consumption Inventories	Annual	Q	Petroleum Fuels Survey (6512-79)	As above	Forms sent to all railroads except C.N.R. and C.P.R., and to transportation systems of the largest cities.
Refinery products , 18 types handled by refineries, by 9 areas, by barrels; losses, by barrels.	Production Purchases Imports Inventories Transfers Domestic sales Exports Losses Use Net sales in Canada	Monthly	Q	Refinery Report for Month of (6512-6)	Data published in <i>Refined Petroleum Products*</i> (208) and <i>Refined Petroleum Products (Preliminary Report)*</i> (209)	

Crude oil received by refineries in eight areas, by source, by barrels.	Receipts	Monthly	Q	Refinery Report for Month of (6512-6)	Data consolidated for six areas in <i>Refined Petroleum Products*</i> (208)
Crude oil, natural gas liquids , and other materials used by refineries, by 8 areas, by barrels.	Production Purchases Imports Inventories Domestic sales Exports Transfers Losses Use	Monthly	Q	As above	Data consolidated for six areas in <i>Refined Petroleum Products*</i> (208) and Canada totals in <i>Refined Petroleum Products (Preliminary Report)*</i> (209)
Crude petroleum used by refineries, receipts, consumption, inventory, and expected receipts in next three months; in barrels of 35 imperial gallons.	Receipts Use Inventories Expected receipts	Monthly	Q	Monthly Report on Crude Petroleum Requirements (6512-177)	<i>Canadian Crude Oil Requirements - Refinery Summary</i>
Lubricating oils 3 types, lubricating greases 2 types, automotive gear oils; sales to 7 regions and exports by barrels.	Sales	Annual	Q	Sales of Lubricating Oils and Greases and Motor Gasoline (6512-159)	Domestic sales in <i>The Petroleum Products Industry*</i> (207)
Automotive lubricating oils and greases, motor gasoline ; sales to 2 types of consumer, in 7 regions, by barrels.	Sales	Annual	Q	As above	
VOL. II PT. XVIII					
CHEMICALS AND ALLIED PRODUCTS					
Types of chemicals made in Canada with names of producers of each type.	Name of producer	Occasional	N.A.	Sundry schedules	Chemical Directory as of January 1954 (181)
Sulphuric acid , production by tons and shipments by tons and value; caustic soda and chlorine , production by tons.	Production Domestic sales Imports Exports	Annual	Q Q V	Collected by letter	<i>Sulphuric Acid, Caustic Soda and Chlorine</i>
Fertilizer materials 25 types, mixed fertilizers 2 types, production, imports, exports, domestic sales by province, by tons.	Production Domestic sales Imports Exports	Annual (year ending 30 June)	Q	Fertilizer Trade (6512-172.1)	Selected items in <i>The Fertilizer Trade*</i> (189)
As above, but domestic sales only, by tons.	Domestic sales	Annual (year ending 30 June)	Q	Fertilizer Trade (6512-172.6)	Selected items in <i>the Fertilizer Trade*</i> (189)
Mixed fertilizers 54 types, exports, domestic sales by province, by tons.	Domestic sales Exports	As above	Q	Fertilizer Trade Sales of Mixed Fertilizer by Grades (6512-172.2)	As above
Tobacco Fertilizers 8 types; mixed fertilizers containing boron 20 types, containing magnesium oxide 19 types; exports and domestic sales by province, by tons.	Domestic sales Exports	As above	Q	Fertilizer Trade, Sales of Special Grades (6512-172.3)	As above
				Small firms only.	
				Metal and Chemical Products Section.	
				Published at irregular intervals.	
				Early data. Publication also gives trade and consumption data.	
				All data are for the year ending 30 June.	

Commodities	Concepts covered	Periodicity	Measured by quantity or value	Schedule used	Name of D.B.S. publication	Remarks
VOL. II PT. XVIII — concluded						
CHEMICALS AND ALLIED PRODUCTS — concluded						
Fertilizer materials all kinds and mixed fertilizers all grades; sales by county for P.E.I., N.S., N.B., Qué., and Ont.; sales by province for remainder; by tons.	Sales	Annual (year ending 30 June)	Q	Fertilizer Trade, Sales of Fertilizer Materials and of Mixed Fertilizers (6512-172.4)	Selected items in the <i>Fertilizer Trade*</i> (189)	Metal and Chemical Products Section
Mixed fertilizers , containing pesticides , exports and domestic sales by tons; trace elements sales by pounds.	Domestic sales Exports	Annual (year ending 30 June)	Q	Fertilizer Trade, Sale of Mixed Fertilizers Containing Pesticides and Sales of Trace Elements (6512-172.5)	<i>The Fertilizer Trade*</i> (189)	
Fertilizer materials 18 items and mixed fertilizers 28 items, sold in Ontario from 1 July to 31 October in short tons.	Sales	Occasional	Q	Special Survey of Sales of Fertilizers in Ontario (6512-130)	<i>Fertilizer Materials and Mixed Fertilizers sold in Ontario</i>	
Ammonium sulphate , production in tons, shipments in tons and dollars, sales by province in tons.	Production Shipments	Annual	Q Q V	Collected by letter	<i>Ammonium Sulphate</i>	
Paints, varnishes and lacquers , total trade sales 2 types, industrial sales 2 types, by dollars.	Sales	Monthly	V	Monthly Report on Sales of Paints, Varnishes and Lacquers (6512-137)	<i>Sales of Paints, Varnishes and Lacquers</i> (192)	
Soap 7 types and synthetic detergents 6 types, production by pounds and shipments by pounds and dollars.	Production Shipments	Monthly	Q Q V	Monthly Report on Soaps and Synthetic Detergents (6512-5)	<i>Production and Factory Shipments of Soaps and Synthetic Detergents</i>	
Pest control products 128 types, sales in Canada and abroad, by quantity and value.	Domestic sales Exports	Annual	Q V	Sales of Pest Control Products by Canadian Registrants (6512-151)	<i>Sales of Pest Control Products by Canadian Registrants</i> (194)	
Anti-freeze preparations , glycol type and alcohol type, production by gallons, sales by gallons and value.	Sales	Annual	Q V	Collected by form letter (6512-251)	<i>Anti-Freeze Preparations</i>	
Chemicals used in municipal waterworks, by pounds.	Use	Biennial	Q	Consumption of Chemicals in Municipal Waterworks in Canada (6512-194)	Consumption of 25 types in <i>Consumption of Chemicals in Municipal Waterworks</i> (184)	Last survey was for 1954 and 1955.
